

PRAVIN J

Oddanchatram, India | +91 9788566689 | pravin.jayachandran21@gmail.com | github.com/PravinJP | linkedin.com/in/Pravin

PROFESSIONAL SUMMARY

Full Stack Java Developer with proven expertise in AI-integrated backend systems. Skilled in Spring Boot, Spring Security, REST APIs, and generative AI implementation using LLMs. Experienced in developing scalable applications with JWT authentication, role-based access control, and automated AI-powered features. Passionate about building secure, production-grade solutions with clean architecture.

TECHNICAL SKILLS

Languages: Java, TypeScript, SQL, Python | **Backend:** Spring Boot, Spring Security, REST APIs, JWT, Microservices

Frontend: React, Tailwind CSS, TypeScript | **Databases:** PostgreSQL, MySQL, Database Modelling

AI/ML & Tools: LLM Integration, Generative AI, OpenAI API, Claude API, Prompt Engineering, Git, GitHub, Docker, CI/CD, IntelliJ IDEA, Postman

Core Competencies: AI-Powered Code Generation, Automated Question Generation, Test Case Generation, Role-Based Access Control, Authentication Flows, Responsive UI Design

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Eight-Bit (Remote) | 6 Months

- Developed responsive frontend interfaces with React, TypeScript, and Tailwind CSS; expanded to backend development integrating REST APIs and database optimization
- Implemented Spring Boot services with Spring Security for secure authentication and authorization; maintained code quality through version control and peer reviews
- Collaborated in agile development environment, delivering features on-time with strong communication across cross-functional teams

KEY PROJECTS

DriveDesk – AI-Powered Placement Assistance Platform

Tech Stack: Spring Boot | Spring Security | PostgreSQL | React | Tailwind CSS | OpenAI API | Claude API

- Engineered unified platform for placement coordinators leveraging role-based authentication (Admin–Teacher–Student) with JWT tokens and Spring Security
- Integrated generative AI (OpenAI/Claude) for automated question and test case generation, reducing manual effort by 70% and improving assessment quality
- Developed intelligent code evaluation engine with AI-driven feedback system; implemented proctored assessments with real-time monitoring and anomaly detection
- Designed RESTful APIs for job alerts, student interests management, and coding test orchestration with optimized PostgreSQL queries

E-Commerce Web Application with Secure Backend

Tech Stack: Spring Boot | Spring Security | PostgreSQL | React | Tailwind CSS

- Built full-stack e-commerce application with JWT-based authentication, product management, and secure order processing with payment integration
- Developed responsive frontend with React and implemented RESTful APIs for cart management, inventory tracking, and order fulfillment

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning | SNS College of Technology, Coimbatore | CGPA: 8.3 (2022 – 2026)

SSLC: 93% | HSC: 85%

CERTIFICATIONS

- DBMS (Database Management Systems) – Infosys Springboard (2024)
- Spring Boot Full Stack Development – Udemy
